PROJECT REPORT-Smart Library Request Workflow in ServiceNow

1. INTRODUCTION

1.1 Project Overview

The Smart Library Request Workflow is a system developed using ServiceNow to automate the process of requesting, approving, and managing library books. It replaces manual operations with a digital workflow, improving efficiency and reducing errors.

1.2 Purpose

The purpose of this project is to simplify the library management system by enabling students to request books online and allowing librarians to manage approvals efficiently.

2. IDEATION PHASE

2.1 Problem Statement

Manual handling of library requests is time-consuming, lacks transparency, and creates difficulty in tracking issued books.

2.2 Empathy Map Canvas

- **Users:** Students and Librarians
- **Think:** Need faster book access
- **Feel:** Frustration due to delays
- **Do:** Manually request books
- **Pain:** No proper tracking system
- **Gain:** Automated and easy system

2.3 Brainstorming

Ideas generated:

- Online request system
- Automated approval workflow
- Notification system
- Book tracking system

3. REQUIREMENT ANALYSIS

3.1 Customer Journey Map

1. Student logs in
2. Searches for book
3. Submits request
4. Librarian reviews request
5. Approval/Rejection
6. Notification sent

3.2 Solution Requirement

Functional Requirements:

- Request books
- Approve/reject requests
- Track status

Non-Functional Requirements:

- User-friendly interface
- Secure system
- Fast processing

3.3 Data Flow Diagram

- Student → Request → System
- System → Librarian
- Librarian → Approval → System
- System → Notification → Student

3.4 Technology Stack

- ServiceNow Platform
- Web Browser
- Workflow Automation
- Database Tables (ServiceNow)

4. PROJECT DESIGN

4.1 Problem Solution Fit

The system directly solves the issue of manual processing by automating request handling and approvals.

4.2 Proposed Solution

A centralized system where students can request books and librarians can manage approvals digitally.

4.3 Solution Architecture

- User Interface (Forms)
- Application Logic (Workflow)
- Database (Tables)

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

Task	Duration
Planning	2 days
Design	3 days
Development	5 days
Testing	2 days

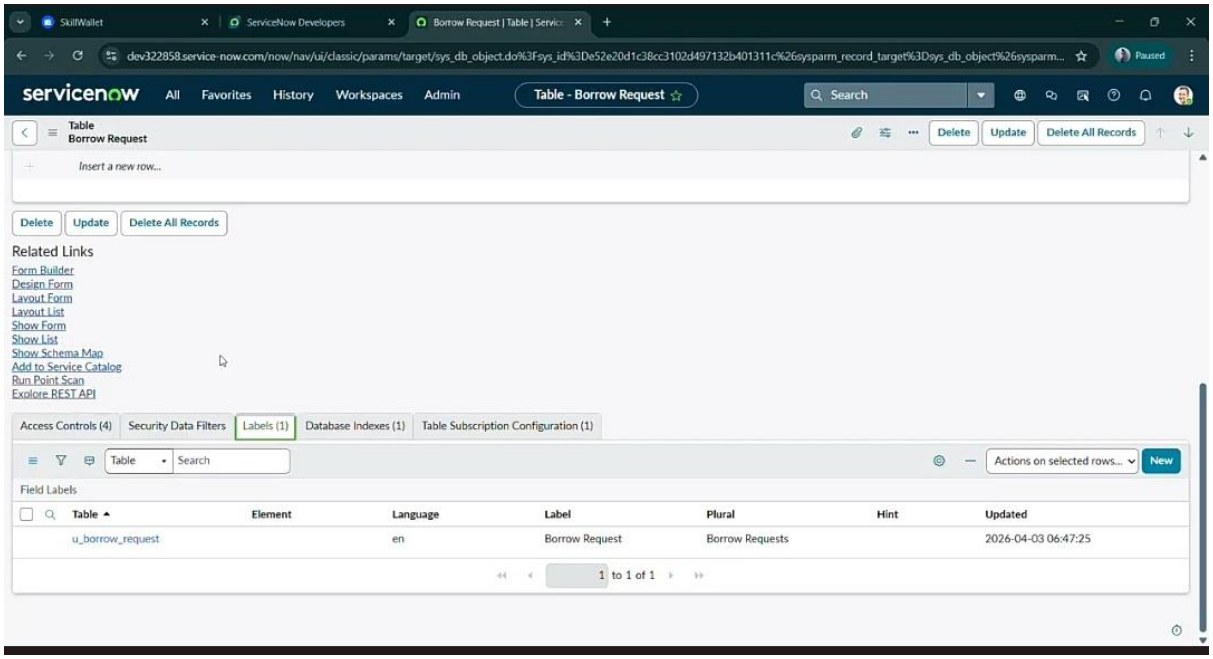
6. FUNCTIONAL AND PERFORMANCE TESTING

6.1 Performance Testing

- Tested system response time
- Verified workflow execution
- Checked multiple requests handling

7. RESULTS

7.1 Output Screenshots



8. ADVANTAGES & DISADVANTAGES

Advantages:

- Saves time
- Easy to use
- Automated process

Disadvantages:

- Requires internet
- Dependent on ServiceNow

9. CONCLUSION

The Smart Library Request Workflow successfully automates the book request process, improving efficiency and reducing manual effort in library management.

10. FUTURE SCOPE

- Mobile application integration
- Advanced reporting system
- Email/SMS alerts
